## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 2-3 and 17,19,21 and 23 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 13,14,15 and 16 respectively. See MPEP § 706.03(k). Also claims 4,18,20,22 and 24 are not been further treated on the merits, as they are dependent from claims 3,17,19,21 and 23 respectively. Claim 26 is not been further on the merits as it is dependent from claim 27.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2838

3. Claims 2-26 are rejected under the judicially created doctrine of double patenting over claims 1-19 of U. S. Patent No. 6,721,191 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

Both the sets of claims directed toward a resonant converter comprising: multiple converter outputs, including a transformer having a primary winding and at least two secondary windings wherein the resonant frequency of the resonant converter determined by the main inductance and a leakage inductance of the transformer and by a capacitive element.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 5-6,8-9, and 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Wittenbreder, Jr. (U.S. Patent # 5,402,329).

Art Unit: 2838

Wittenbreder Jr. disclose claimed invention a resonant converter (figure 7), including two secondary windings of different winding directions (column 7, line 1-5 and figure 7), additional inductive element (column 12, line 30-45).
